4-Shaft Drafts

Choose your draft

Below are threading drafts for the workshop. Choose the one you would like to weave. For the easiest threading, choose a draft that can be threaded all in one color. If you have time, you may choose to use two or more colors in your warp. The colors shown are just examples. In the first draft the colors are peach and blue, the suggestion is a light and medium color. You might choose natural and mint or any two colors where there is some contrast in value. For the second draft, a stronger contrast in value works better.
